

ROHIT J G

+91 9384260810 | Tenkasi, Tamil Nadu, India | jgrohit.exe@gmail.com | linkedin.com/in/rohitjg | github.com/rohitjg13

EDUCATION

- Shiv Nadar Institution of Eminence** Greater Noida, India
B.Tech in Electrical and Computer Engineering; CGPA: 8.28 *Aug 2024 – Expected May 2028*

WORK EXPERIENCE

- Full Stack Developer Intern** **Jun 2025 – Dec 2025**
Hypr *Remote*
 - Full-Stack Logistics:** Collaborated with product and operations teams to architect React Native and React platforms, digitizing manual workflows and replacing phone-based dispatching with streamlined tracking, achieving **50%** faster shop-to-driver assignment.
 - Customer Coordination:** Worked with stakeholders to orchestrate WhatsApp Cloud API workflows, eliminating **100%** of manual confirmation calls via autonomous GPS collection and delivery slot selection.
 - Integrations:** Engineered FastAPI backend integrating Shopify, WooCommerce, and Odoo ERP, aligning data flows across systems to support **1,000+** daily potential transactions.
- Full Stack Developer** **May 2025 – Aug 2025**
Personal Cloud *Freelance*
 - Zero-Touch Onboarding:** Worked closely with the client to reduce cloud server setup time from **30+ mins** to **2 mins** through a BLE-based mobile onboarding flow using Python D-Bus and BlueZ for headless Raspberry Pi deployment.
 - Cloud Infrastructure:** Provisioned a React Native application with Supabase Auth and WebDAV sync and coordinated secure HTTPS access via Cloudflare Tunnels.

LEADERSHIP

- Team Lead, Dev Team** Shiv Nadar Institution of Eminence
Google Developer Groups (GDG) On Campus *Aug 2025 – Present*
 - System Architecture Mentorship:** Guiding **50+** students in advanced backend architecture, emphasizing database queuing, cache-aside patterns, and entity isolation to deliver scalable production-grade systems.
 - Technical Execution:** Driving the technical roadmap for campus-wide applications and enforcing rigorous code reviews to uphold high engineering standards across the development team.

PROJECTS

- Scooby – Timetable Tool** 🌀: Launched a SvelteKit application for university schedule management; scaled to **1,600+ users (35% of student body)** within 72 hours; optimized collision checking from **15 mins** to **30 secs** via algorithmic Excel parsing.
- FindYourDate – AI Matchmaker** 🌀: Scaled an AI-driven dating platform to **1,500+ users** with **250+ concurrent users** on a single VPS; implemented Hungarian Algorithm with OpenAI embeddings; integrated Qdrant vector search for optimized similarity matching.
- Labyrinth – Multiplayer Platform** 🌀: Architected a Go-based multiplayer backend with TTL caching and real-time message queuing using channels; reduced database load via cache-aside patterns; ensured low-latency state synchronization.
- Idea2Solid – Text-to-3D Generator** 🌀: Devised a RAG pipeline using LangGraph and FAISS to convert natural language prompts into STL files; integrated GPT-4o-mini with OpenSCAD for 3D generation; developed a Svelte and Three.js frontend for real-time visualization.
- Brew – AI Study Extension** 🌀: Delivered a Chrome extension leveraging **Generative AI (Gemini)** and **RAG** for PDF Q&A; implemented lecture note ingestion; maintained a Node.js and MongoDB backend with JWT authentication.

ACHIEVEMENTS

- National 1st – CBSE Robotics:** Conceived a disaster management drone with LoRa-based communication.
- State 1st – Kalvium Coding:** Secured first rank in Tamil Nadu state-level coding competition for schools.
- Hackathons:** Won 1st at SSH for a CV-based garbage classifier and 3rd at ACM-W Hackathon for Brew, an AI tool.

SKILLS

Skills: Python, TypeScript, JavaScript, C++ (Microcontrollers), FastAPI, React, React Native, SvelteKit, Node.js, PostgreSQL, MongoDB, Supabase, Cloudflare, LangChain, RAG, YOLOv8, Qdrant, Raspberry Pi, Arduino, Linux, Git, REST APIs, Docker, HTML, CSS
