

ROHIT J G

+91 9384260810 | Tenkasi, Tamil Nadu, India | jgrohit.exe@gmail.com | linkedin.com/in/rohitjg | github.com/rohitjg13

EDUCATION

- Shiv Nadar Institution of Eminence** Greater Noida, India
B.Tech in Electrical and Computer Engineering; CGPA: 8.28 *Aug 2024 – Expected May 2028*

WORK EXPERIENCE

- Full Stack Developer Intern** **Jun 2025 – Dec 2025**
Hypr - Hyperlocal delivery in Qatar *Remote*
 - Full-Stack Logistics:** 50% faster shop-to-driver assignment by building a React Native and FastAPI platform that replaced phone-based dispatching with streamlined tracking
 - Customer Coordination:** 100% elimination of manual confirmation calls by orchestrating WhatsApp Cloud API workflows with autonomous GPS collection and delivery slot selection, collaborating with stakeholders.
 - Integrations:** 1,000+ daily potential transactions supported by engineering a FastAPI backend integrating Shopify, WooCommerce, and Odoo ERP, aligning data flows across systems
- Full Stack Developer** **May 2025 – Aug 2025**
Personal Cloud *Freelance*
 - Zero-Touch Onboarding:** 30+ mins to 2 mins reduction in cloud server setup time, worked with the client to build a BLE-based mobile onboarding using Python D-Bus and BlueZ for headless Raspberry Pi deployment
 - Cloud Infrastructure:** Collaborated on provisioning a React Native application with Supabase Auth and WebDAV sync, coordinating secure HTTPS access via Cloudflare Tunnels

LEADERSHIP

- Team Lead, Dev Team** Shiv Nadar Institution of Eminence
Google Developer Groups (GDG) On Campus *Aug 2025 – Present*
 - System Architecture and Mentorship:** Mentored 50+ students on backend architecture, Git-based collaboration, and scalable system design including queuing, cache-aside patterns, and entity isolation.
 - Technical Execution:** Led development of campus-wide applications, conducted code reviews, and introduced advanced topics such as computer vision and applied AI through focused workshops.

PROJECTS

- Scooby – Timetable Tool** 🛠️: Launched a SvelteKit application for university schedule management; scaled to 1,600+ users (35% of student body) within 72 hours; optimized collision checking from 15 mins to <30 secs via algorithmic Excel parsing. (Dec 2025)
- FindYourDate – AI Matchmaker** 🛠️: Scaled an AI-driven dating platform to 1,500+ users with 250+ concurrent users on a single VPS; implemented Hungarian Algorithm with OpenAI embeddings; integrated Qdrant vector search for optimized similarity matching. (October 2025)
- Labyrinth – Multiplayer Platform** 🛠️: Architected a Go-based multiplayer backend with TTL caching and real-time message queuing using channels; reduced database load via cache-aside patterns; ensured low-latency state synchronization. (April 2025)
- Idea2Solid – Text-to-3D Generator** 🛠️: Devised a RAG pipeline using LangGraph and FAISS to convert natural language prompts into STL files; integrated GPT-4o-mini with OpenSCAD for 3D generation; developed a Svelte and Three.js frontend for real-time visualization. (Nov 2025)
- Brew – AI Study Extension** 🛠️: Delivered a Chrome extension leveraging **Generative AI (Gemini)** and **RAG** for PDF Q&A; lecture note ingestion; maintained a Node.js and MongoDB backend with JWT authentication. (Jan 2025)

ACHIEVEMENTS

- National 1st – CBSE Robotics:** Conceived a disaster management drone with LoRa-based communication.
- State 1st – Kalvium Coding:** Secured first rank in Tamil Nadu state-level coding competition for schools.
- Hackathons:** Won 1st at SSH for a CV-based garbage classifier and 3rd at ACM-W Hackathon for Brew, an AI tool.

SKILLS

Languages: Python, TypeScript, JavaScript, C++
Full-Stack: FastAPI, React, React Native, SvelteKit, Node.js, REST APIs
Databases: PostgreSQL, MongoDB, Supabase
AI & Systems: LangChain, RAG, YOLOv8, Qdrant, Linux
Cloud & DevOps: Cloudflare, Docker, Git
Embedded: Raspberry Pi, Arduino
